### **CommScope Enterprise Solutions Joins The Green Grid**

*CommScope seeks to bring the best practices for environmental stewardship to its partners and customers*

**RICHARDSON, Texas – July 22, 2008** – CommScope Enterprise Solutions, a division of CommScope, Inc. (NYSE:CTV), has joined The Green Grid, a global consortium dedicated to advancing energy efficiency in data centers and business computing ecosystems. As a general member of The Green Grid, CommScope will collaborate with other member companies and gain access to a wealth of information about energy efficiency advancements within data centers.

Over the last decade, CommScope has taken the initiative to significantly reduce its carbon footprint when manufacturing its premier network infrastructure solutions. Its award-winning ReelSmart<sup>®</sup> cable reel recycling program, EcoPower<sup>™</sup> cabinets and continued use of renewable material are a few ways CommScope is helping to safeguard the environment through its own best practices. In addition, CommScope voluntarily reports its greenhouse gas emissions, numbers that have steadily decreased since 2002.

CommScope's green efforts also include passing energy-efficient and energy-saving practices on to its customers. For example, CommScope's Intelligent Building Infrastructure Solutions (IBIS) employs a single backbone that supports building systems such as security, lighting, HVAC and communications in order to supply greater efficiency and higher productivity with increased comfort.

"At CommScope, we advocate and support The Green Grid's efforts to unite and

work toward energy-efficient, eco-friendly solutions,” said Luc Adriaenssens, senior vice president, Research and Development and Technology, CommScope Enterprise Solutions. “We understand the importance of safeguarding the environment and are committed to making a difference while setting a strong example for others. While we continually focus our efforts on superior product manufacturing, outstanding customer service, employee excellence and company value, environmental stewardship has been and will continue to be a top priority.”

The Green Grid seeks to provide industry-wide recommendations on best practices, metrics and technologies that will improve overall data center and business computing energy efficiencies. By joining The Green Grid, CommScope is helping influence both developers and end users of data center technology.

CommScope Enterprise Solutions, a division of CommScope, Inc., offers a complete portfolio of network infrastructure solutions that enable enterprise customers, regardless of size, industry or IT budget, to take advantage of business and technology opportunities. The division’s SYSTIMAX® and Uniprise® product lines offer voice, data, video and converged solutions ranging from mission-critical, high-bandwidth and emerging applications to applications that demand unrelenting reliability and quality for everyday needs. Backed by CommScope Labs, the product lines are delivered through a global channel network of industry-leading BusinessPartners and distributors, ensuring a consistent and high-level of service and support worldwide.

### **About CommScope**

CommScope, Inc. (NYSE: CTV – [www.commscope.com](http://www.commscope.com)) is a world leader in infrastructure solutions for communication networks. Through its Andrew® brand, it is a global leader in radio frequency subsystem solutions for wireless networks. Through its SYSTIMAX® and Uniprise® brands, CommScope is a world leader in network infrastructure solutions, delivering a complete end-to-end physical layer solution, including cables and connectivity, enclosures, intelligent software and network design services for business enterprise applications. It is also the premier manufacturer of coaxial cable for broadband cable television networks and one of the leading North American providers of environmentally secure

cabinets for DSL and FTTN applications. Backed by strong research and development, CommScope combines technical expertise and proprietary technology with global manufacturing capability to provide customers with infrastructure solutions for evolving global communications networks in more than 130 countries around the world.

*This press release includes forward-looking statements that are based on information currently available to management, management's beliefs, as well as on a number of assumptions concerning future events. Forward-looking statements are not a guarantee of performance and are subject to a number of uncertainties and other factors, which could cause the actual results to differ materially from those currently expected. For a more detailed description of the factors that could cause such a difference, please see CommScope's filings with the Securities and Exchange Commission. In providing forward-looking statements, the company does not intend, and is not undertaking any obligation or duty, to update these statements as a result of new information, future events or otherwise.*
